### THE ROLE\_

Senior Engineering Leads at Talon develop our market leading products, crafting code as well as leading team members in agile software delivery. Working with the Product Owners they will create and manage their product roadmap.

We are looking for curious & inquisitive technology practitioners. You can expect to work in small (5-8) people teams, working very closely with the end users, iteratively developing and evolving the solution. We are continually on the search for passionate, bright and energetic professionals to join our team.

Working with other Senior Engineering Leads (both in house and 3<sup>rd</sup> party) and the CTO you will shape the architecture of our platforms across the Talon group in the UK, North America and other emerging markets.

### RESPONSIBILITIES AND RELATIONSHIPS\_

- Day to day management of the product backlog and development team delivering the fortnightly sprints.
- Working closely with the Product Owner to ensure the backlog meets the overall business strategy.
- Co-ordinating the sprint showcases and other ceremonies.
- Development and delivery of applications using Java, React, Angular, MongoDB and Amazon Web Services.
- Analysis, design, coding, and implementation of large-scale custom-built applications.
- Code refactoring and optimisation.
- Virtualisation & DevOps. Experience with Terraform, Kubernetes, and Docker preferable.

Talon is an equal opportunities employer. We celebrate diversity and are committed to creating an inclusive environment where all individuals can thrive. We seek to employ and develop a workforce representative of the markets that we serve and brands that we represent.
